The Need for Digital Governance

Traditional government systems face mounting challenges. Embracing digital governance transforms public service delivery, enhances transparency, and empowers citizens with faster, more accountable services.

Challenges in Traditional Systems

- Paper-based processes
- Delayed approvals
- Limited transparency
- Data duplication
- Difficulty in tracking services

Digital Governance Benefits

- Faster service delivery
- Improved accountability
- Real-time monitoring
- Better citizen experience

Innovation Delivered!

LMS & Social Welfare

- LMS Suite – Online training, certification & analytics
- Social Welfare Suite – Beneficiary registration, scheme eligibility & fund disbursement
- Fisheries & Pollution Control Systems

E-Office & Vendor Management

- E-Office & File Management – Digital approvals & workflow automation
- Vendor & Bill Management – Procurement, invoicing & audit readiness
- Finance & Audit System

GIS, Analytics & Finance

- GIS & Tagging Solutions – Geo-tagging, spatial analytics & field data
- Dashboard & Analytics – Real-time KPIs & decision support
- Managed Cloud & Mobile App Development

Our E-Governance Solution Portfolio

IN22Labs delivers end-to-end digital transformation solutions for government departments — from learning management and social welfare to GIS, analytics, cloud, and mobile platforms.

In22 labs

Innovation Delivered!

LMS Suite Software

A powerful, centralized learning management platform designed for government departments. Scalable for large organizations with streamlined training delivery, assessment, and performance tracking capabilities.

Key Features

- Online training management
- Course creation & delivery
- Assessment & certification
- Attendance tracking
- Performance analytics

Benefits

- Centralized learning platform for all departments
- Scalable for large government workforces
- Improved training efficiency & compliance
- Real-time progress monitoring

In22 labs

Innovation Delivered!

Social Welfare Suite

A comprehensive digital platform designed to streamline the delivery of government welfare schemes, ensuring benefits reach the right beneficiaries efficiently and transparently.

Key Features

- Beneficiary registration & verification
- Scheme eligibility assessment
- Application processing & tracking
- Fund disbursement monitoring
- MIS reporting & analytics

Impact & Outcomes

- Reduced manual errors & duplication
- Faster benefit delivery to citizens
- Greater transparency in fund flow
- Improved accountability across departments

Innovation Delivered!

E-Office & File Management System

Enables a fully paperless and efficient office environment by digitising file movement, approvals, and document workflows — reducing delays and improving accountability across government departments.

Digital Workflow Capabilities

- Digital file movement & tracking
- Electronic approvals & sign-offs
- Document repository & version control
- Workflow automation across departments

Efficiency & Compliance Features

- Searchable records & audit trails
- Role-based access control
- Paperless correspondence management
- Real-time status monitoring & reporting

In22 labs

Innovation Delivered!

Vendor & Bill Management System

A comprehensive procurement management platform designed for government departments. Streamlines vendor onboarding, purchase orders, invoice processing, and payment tracking with full audit readiness and financial control.

Modules & Capabilities

Vendor onboarding & registration. Purchase order management. Invoice processing & verification. Approval workflows & escalation. Payment tracking & reconciliation.

Benefits & Outcomes

Faster procurement cycle with reduced delays.
Better financial control and budget visibility.
Improved audit readiness and compliance.
Transparent vendor performance tracking.

GIS & Tagging Solutions

Leverage geospatial intelligence to monitor, manage, and optimize public infrastructure. Our GIS & Tagging platform enables real-time location-based insights for smarter governance.

Geospatial Capabilities

- GIS Mapping & Visualization
- Asset Geo-Tagging
- Location-Based Monitoring
- Field Data Collection
- Spatial Analytics & Reporting

Key Use Cases

- Infrastructure Project Tracking
- Public Asset Management
- Rural Development Monitoring
- Urban Planning Support
- Environmental Zone Mapping

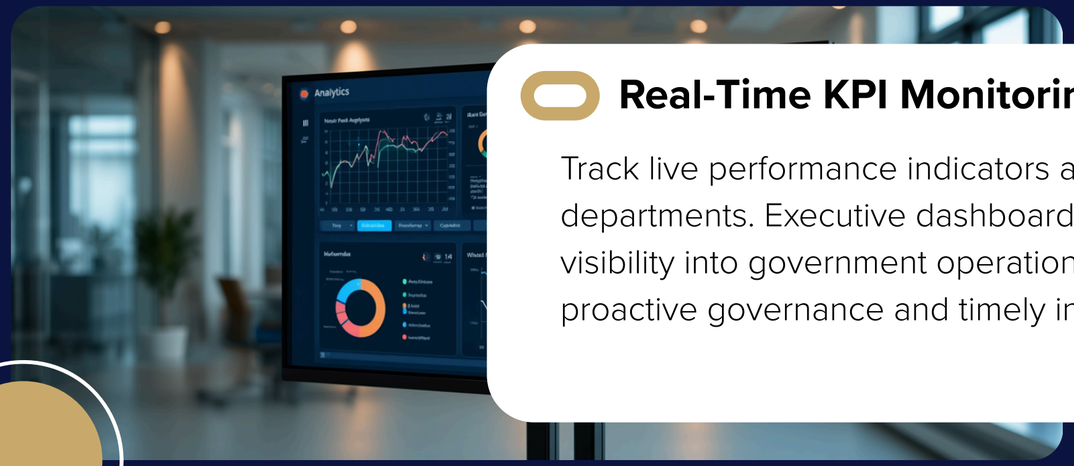
Dashboard & Analytics Solutions

Enables data-driven governance and faster decision-making. Our analytics platform delivers executive dashboards, real-time KPIs, interactive reports, data visualization, and decision support tools for government departments.



Real-Time KPI Monitoring

Track live performance indicators across departments. Executive dashboards provide instant visibility into government operations, enabling proactive governance and timely interventions.

Interactive Reports

Generate dynamic, drill-down reports with advanced data visualization. Decision support tools empower officials with actionable insights for smarter, faster policy decisions.

Finance & Audit System

A robust financial governance platform enabling government departments to manage budgets, track expenses, streamline audits, and ensure regulatory compliance with full transparency and accountability.

Core Functions

- Budget management & allocation
- Expense tracking & reporting
- Audit workflow management
- Compliance monitoring
- Financial reporting & MIS

Key Advantages

- Improved financial transparency
- Reduced compliance risk
- Streamlined audit processes
- Real-time financial visibility
- Faster decision-making

Specialized Government Solutions

Dedicated modules for Fisheries & Inland Water Management and Pollution Control & Environment System — built for regulatory compliance and resource governance.

Fisheries & Inland Water Management

- Resource monitoring
- License management
- Water body tracking
- Production analytics

Pollution Control & Environment System

- Environmental monitoring
- Inspection management
- Compliance tracking
- Incident reporting
